World Blockchain Day

“13 years ago, the blockchain, which began with the desire to push the limits of the existing financial system and to ensure that everyone uses the financial system safely and transparently, came to our side.

Today, we are thinking again about how sustainable the blockchain is and how long it can remain by our side. And we have an obligation to pass blockchain as a great asset for the next generation.

Many projects derived from blockchain technology were enough to go beyond our imagination. The business model of the blockchain such as virtual assets, smart contracts, ICOs, IEOs, Defi, and even recent NFT will be used throughout society and culture with more demands. And the next generation will easily notice that these business models started with transparency, one of the greatest values that blockchain is pursuing.

From today, April 1st will be World Blockchain Day every year, and it will be a starting point and a day for all who pursue hope and happiness through blockchain. Blockchain is used in many places such as finance, logistics, healthcare, trade, and data storage without any experts to manage it. We should carry out the task for our generation more professionally. Starting today, Certified Blockchain Manager (CBM), a blockchain expert, will guide the blockchain world more safely and transparently.

The whole world is having a hard time right now. Nevertheless, as our ancestors did, we will overcome this difficulty wisely. The world may not remember what we fight and how we live through each day, but we will eventually get to live in the world we hope for. The whole world should participate in the message, 'Let's make a transparent world without lies with blockchain!' and try to make blockchain a great asset to be passed on to the next generation.”

April 1st, 2021

President of WBCIA
Yeon Sam-Heum

WBCIA?

The World Blockchain Industry Association (WBCIA) was founded in 2018 to develop a globally competitive blockchain professional enterprise, training innovative blockchain professional talent and the establishment of international standards.

Headquartered in Estonia, the WBCIA is a Blockchain organization whose primary purpose is to be the global community for the 4th industry, enabling its members to generate and maintain significant competitive advantage.

Also, our goal is to advance trust, transparency, safety and innovation through distributed technologies and services.

Finally, WBCIA (World Blockchain Industry Association) promotes blockchain technologies by empowering individuals and organizations to connect, communicate, and collaborate to solve public sector challenges around the world.

Background

Since the advent of Bitcoin in 2009, blockchain has become a buzzword. Enterprises, regulatory bodies, individuals, and researchers are fascinated by this nascent technology and are exploring its application within their respective fields. Blockchain is celebrated as a disruptive technological advancement because of its equitable offering: it is a distributed ledger that records and stores data once it has been validated by the computers or nodes on the ledger's network. Every block of data that gets added to the existing chain is backed by the principles of cryptography.

There are several benefits that emerge from the above definition of a blockchain, one of the most lauded being decentralization. A blockchain dis-intermediates the fundamental role played by centralized authorities and third parties in the verification and validation of data or transactions, by allowing an open network of nodes perform the necessary tasks. This reduces cost, augments efficiency, and creates a trustless ecosystem; benefits that cannot be achieved with manual, legacy processes. Transparency is inherent in a public blockchain, because everyone on the network has access to the ledger.

Status of Blockchain in Each Country

Australia	Countries across the globe are jealous of Australia's tax laws regarding Bitcoin and cryptocurrencies, in general. Taxes have been removed for all transactions and trades done using cryptocurrencies. This is advantageous for day traders as they need not pay taxes for each trade and for Australian citizens as they need not pay taxes for any of their purchases. The Australian Securities Exchange (ASX) announced that blockchain technology would be adopted fully after two years following the two-year testing period.
China	The Chinese government is currently contesting the United States as the largest world power. China houses thousands of blockchain-based startups. Chinese banking consortiums have also started to rally around blockchain. The Government of China is open to adopting blockchain and Artificial Intelligence (AI). Among the major countries, China was the most active player in digital currency. The People's Bank of China aims to commercialize the digital renminbi before the 2022 Beijing Winter Olympics.
Japan	Japan has always been several months ahead when it comes to Bitcoin and crypto adoption. Some of the retail stores in Japan accept Bitcoin. It is among the largest Bitcoin traders. According to a Nikkei report cited in a note by Masao Muraki, who is a global financial strategist at Deutsche Bank, around 40% of Bitcoin trading in Q4 in the year 2017 was conducted in Yen. Japan is a Bitcoin-native country.
United Arab Emirates (Dubai)	Dubai is known as one of the richest and most technological countries in the world. They have been researching blockchain technology and its transactional efficiency for years now. They are planning to implement it in their cities so that they can have a more seamless economy. A deadline of 2020 has been set by the government to collate all government-related data and documentation and to add it onto the blockchain.
Malta	This European country has positioned itself as a global leader owing to its progressive approach to cryptocurrencies. Cryptocurrencies are accepted as a medium of exchange. The Virtual Financial Assets Act (VFA), which was effective from November 2018, introduced the Innovative Technology Arrangements and Services Act which acts as the regime for future registration and accountability of crypto service providers. It will act as a regulatory framework for cryptocurrencies.
Switzerland	Zug, in Switzerland, is home to some of the world's top blockchain companies. Zug is known as CryptoValley as it offers a powerful platform for global growth in the cryptocurrency space in terms of infrastructure, world-class talent, and accessibility of its local crypto-friendly government. Zug is home to the Crypto Valley Association (CVA), a non-profit which aims to build the world's leading blockchain ecosystem. In 2016, it became the first city in the world to accept Bitcoin payments for tax purposes. In 2017, it announced the launching of its decentralized Ethereum-based digital ID system. In 2018, it successfully completed the first testing of the local blockchain-based voting system. The recent development was the creation of Blockchain TaskForce, for providing a clear-cut framework for companies.

Status of Blockchain in Each Country

USA	In 2013, the Financial Crimes Enforcement Network (FinCEN) bureau understood the necessity to regulate transactions relating to the exchange of cryptocurrencies. In the first quarter of 2014, the USA Internal Revenue Service released a guide about taxation of operations with regard to Bitcoins and other virtual currencies. Bitcoins are treated as property when it comes to federal taxes. Profits from Bitcoin mining are subject to taxation. ICOs are also under regulation in the US. The Security and Exchange Commission (SEC) controls tokens which thereby reduces the threat that ICOs will not be able to fulfill their tokens within the specified time limit.
Estonia	The government has digitized its services using blockchain technology. The potential of blockchain is rapidly increasing and hence, a lot of startups have started their innovative blockchain projects. In 2013, it turned to blockchain when it wanted to secure the health records of its 1.3 million residents. It is now digitized. There are many aspects of Estonia's business environment which were favored by many crypto entrepreneurs and these include 0% tax on undistributed profits and 100% online cross-border manager. e-Residency, backed by the Estonian government, ensures the legitimacy of ICOs and cryptocurrencies.
United Kingdom	The UK Government has been embracing blockchain technology in many ways. It houses the second-highest number of blockchain startups. Blockchain technology in the UK has the potential to improve issues of identity theft and slow financial services. The Foods Standards Agency has implemented blockchain as a regulatory tool for regulating meat data in slaughterhouses. The government's National Archives is collaborating with the University of Surrey on a project named ARCHANGEL. This allows hashes of documents to be registered on archives through a permission blockchain, thereby eliminating the ability to tamper information. The government is looking to implement blockchain in voting and healthcare systems.
Singapore	It is home to the third-largest ICO market. The Monetary Authority of Singapore (MAS) encourages the adoption of blockchain technology in technological and financial sectors. It supports cross-border payments using digital ledger technology. Insurance companies use smart contracts. It is also working towards building a secure healthcare data system. Singapore aims to achieve interconnectivity by using blockchain technology. The above-mentioned countries and many more are caught in a tight race to become the undisputed capital of blockchain innovation. They aim to lead technology for decades by creating an innovative economy with the help of the most intelligent blockchain geeks and tech-savvy minds on Earth. In this technological revolution, there will certainly be a few key winners in this blockchain race over the next decade, across the entire planet.

From (Blockchain Council, <https://www.blockchain-council.org/blockchain/top-10-countries-leading-blockchain-technology-in-the-world/>)

Status of Blockchain in Each Company

FedEx	FedEx is one of the world's biggest logistics manager companies and handles billions of dollars worth of cargo every year. FedEx has now become the first big shipping giant to incorporate Blockchain Technology into their supply chain manager. So far, they are using Blockchains to track high-value cargo and are soon planning to extend the functionality to almost all their shipments. In addition to that, they are also helping to develop the Blockchain based industry standards for supply chain logistics establishing themselves as pioneers in this field.
Burger King Russia	Fast-food giant Burger King has launched its crypto-currency token in Russia, called WhopperCoin on the Waves platform. Named after the brand's flagship burger, WhopperCoin is Burger Kings's attempt at using Blockchain to power their rewards program. What's unique about this approach is that unlike traditional rewards programs, WhopperCoin tokens can be stored online, traded or even transferred to other people using the Waves platform. Customers would receive a WhopperCoin for every Rouble they spend at Burger King and correspondingly a Whopper could be bought for 1700 WhopperCoin. This is a significant move that can have far-reaching consequences for all kinds of rewards programs – from movie theatres to frequent flier miles.
KIK	KIK is one of the biggest online chat platforms with over 300 million active users. KIK concluded its ICO in 2017 and had recently integrated the Kin cryptocurrency in their platform which can be used to make payments to other users of the platform. The Kin Foundation announced it would be able to offer zero-fee transactions by using its unique network. KIK's goal is to integrate blockchain based payments into services that people already use creating an entire economy around their cryptocurrency.
IBM	IBM is shaping up to be one of the giants in the cryptocurrency space by providing the backbone of Blockchain related services to businesses. Using the Hyperledger Blockchain creator tool, they can help the organizations to create their own distributed ledger and smart contract systems. They have already partnered with some businesses that deal with logistics to increase efficiency and lower costs for them. The partners include logistics giants like Walmart and banks like the Bank of Montreal (BMO), CaixaBank, Commerzbank, Erste Group, and the United Bank of Switzerland (UBS). With food logistics as in the case of Walmart, the goal is to make the supply chain more secure so that contamination can be reduced. While the banks have come to develop a Blockchain trade finance platform called Batavia.
Walmart	Walmart and nine other food companies have partnered with IBM to create a Blockchain for tracking food globally through its supply chain. Real-time data will be captured at every point, on every single food product. The Food Trust Blockchain, which includes Nestlé SA, Dole Food Co., Unilever, and several others. These companies have been collaborating with IBM on the initiative since 2016 and began conducting trials of the product in August of last year. Their goal is to improve the companies' ability to identify issues involved with food recalls, such as tracing outbreaks more quickly to limit customer risk. Walmart appears to have joined the initiative after the outbreak of salmonella in the supply chain last year.

Status of Blockchain in Each Company

Microsoft	Microsoft is another tech giant that has embraced Blockchain Technology since its inception. Microsoft had started accepting Bitcoin payments on its website in 2014 when almost no one had even heard of cryptocurrencies. Microsoft has also secured some 40 patents related to the use of Blockchains as payment gateways and for secure storage. Bill Gates and several of his nonprofit decentralized have looked at Blockchains to try to improve the workings within their organization. Microsoft is also letting businesses and developers deploy their own Blockchain using Stratis in Microsoft Azure. Microsoft Azure is a cloud computing service created by Microsoft for building, testing, deploying, and managing applications Microsoft-managed data centers.
Overstock	Overstock has been one of the biggest proponents of Blockchain Technology from the beginning and lets users purchase all the items on their website using Bitcoin. The company sells home decor, furniture, bedding, and many other goods that are closeout merchandise. Patrick M. Byrne, the founder of the company, is a staunch supporter of cryptocurrencies and has been outspoken about his commitment to decentralized money.
Mastercard	Mastercard has filed over 30 Blockchain related patents, some under the title of “Method and System For Instantaneous Payment using Recorded Guarantee”, which seems to imply that they are building their own Blockchain based payment gateways. Bitcoin has been said to be disruptive to payment processors like Mastercard and VISA so it makes sense that they would explore their private alternatives to Bitcoin-based payments.
Huawei Technologies	Huawei wants to use Blockchains to organize the mobile industry further to reduce fraud and trickery. Huawei claimed in a recent press release that, “Blockchain Technology offers mobile carriers superb opportunities to support the transformation of business models through new network layers, which can revolutionize how data integrity is verified and value and rights are transmitted and tracked over the infrastructure to subscribers.”
Bank of America	Bank of America has recently applied for nine more blockchain related patents, a sign that the bank is open to using Blockchains in its operations. Bank of America hopes to use open-sourced ledgers to create more efficient financial transactions for consumers and business. Combined with Ripple’s XRP token, Bank of America could save billions of dollars every year in cross-border payments.

From (Blockchain Council, <https://www.blockchain-council.org/blockchain/top-10-companies-that-have-already-adopted-blockchain/>)

Current Address of Blockchain I

Lack of standards

The other major roadblock to growth in blockchain technology has to do with regulatory standards. Operating without national or international regulatory standards is normal in the emergent tech space, and in the case of blockchain, it will take a number of years to shift the legal framework of communication between entities from a centralized third party to an impartial decentralized system.

Each new application of blockchain comes with its own set of regulatory questions because, as we know, this form of communication and data storage is new to everyone. That means scams and market manipulation are a definitive risk – for the time being.

Hot-topic areas of concern are liability and responsibility (on behalf of the builders and the organization leveraging the technology), compliance, transparency and reporting, taxonomy and reporting, and – of course – data security.

Over the years, there has been some progress on the regulatory front. According to a study by Deloitte, 17 U.S. state legislatures have passed bills concerning the adoption of blockchain. Furthermore, several other countries are formulating blockchain-friendly legislation to leverage the merits of this technology, including Malta, Estonia, Switzerland, Singapore, and Japan.

Current Address of Blockchain II

A technology that is constantly changing

There is no best blockchain platform out there. In fact, there are new blockchain platforms created every month and each with their own unique set of features. What we are seeing is a rapid iteration of the same underlying technology, which includes a cryptographic key, a distributed ledger with a shared transaction history, and a platform with an engagement protocol.

Whether it's a permissionless ledger with a proof of work protocol (bitcoin), a proof of stake protocol (as Ethereum aims to become), a private and permissioned blockchain for internal organization communication, or any other of the hundreds of blockchains in use today, the technology is diversifying and maturing at a rapid pace.

This is good for the technology, but means slower integration into popular use.

Current Address of Blockchain III

An absence of established players

Since the platforms keep evolving, it is hard to decipher which of them will become established players in the space. Much like the internet before the rise of Google, the blockchain industry lacks an established, recognizable application builder that offers industry-leading platforms for users.

The blockchain landscape is currently in its infancy, and therefore suffers from an acute shortage of skilled developers. The lack of an adequately trained and skilled workforce for managing the complexity of peer-to-peer networks further translates into a sluggish rate of innovation.

One of the challenges for builders looking to become an established player is improving user education. Without clear platform instructions and helpful educational resources, few platforms will rise to the top and few new users will join.

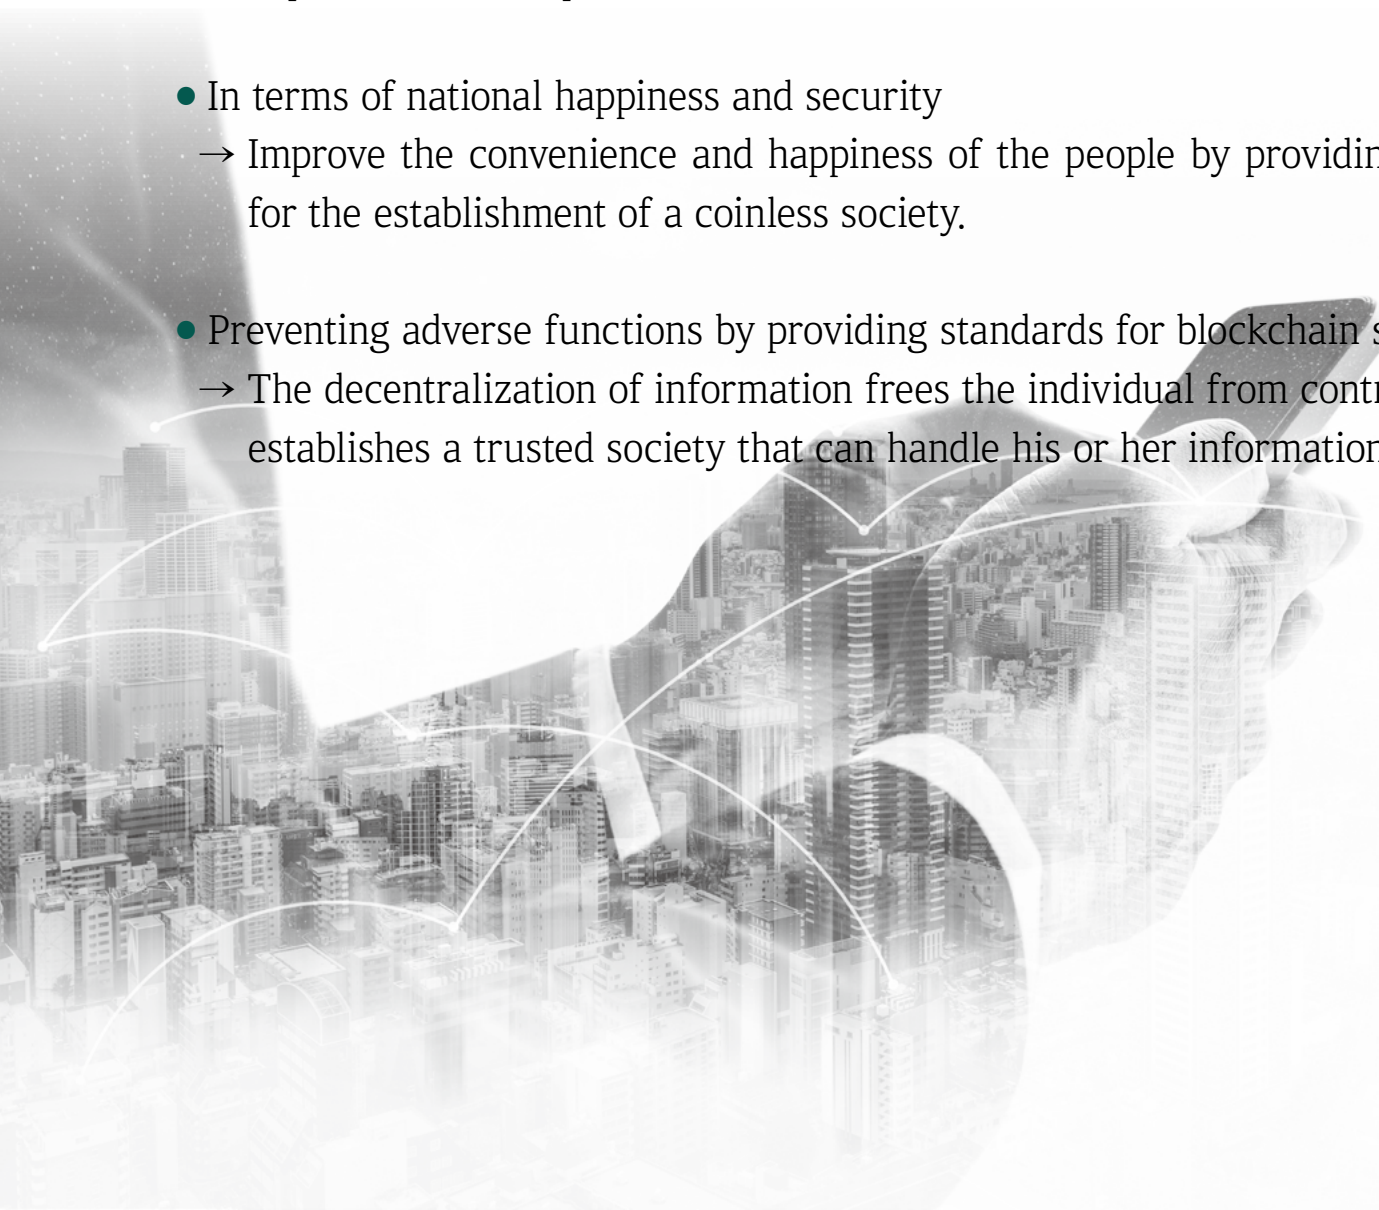

The Solution of WBCIA

1. Research & Standardization of Blockchain System/Regulations

- A study on the establishment of standards and standards for blockchain industry and the establishment of terminology
- A survey on the state of the blockchain industry and related statistics
- A study on the industrial policy and legal systems of blockchain
- Regular policy meetings on key issues related to blockchain

Standardization Expectancy effect

- Strengthening the competitiveness of international standards
 - Standardize various types of platforms and interfaces to enhance the productivity of development and create synergy for the industry.
- Strengthening the competitiveness of small and medium-sized enterprises
 - Deploying standard technology to small businesses to boost blockchain industry and strengthen cooperation with global companies based on core technologies to expand exports of related products/ services.
- In terms of national happiness and security
 - Improve the convenience and happiness of the people by providing standard technology for the establishment of a coinless society.
- Preventing adverse functions by providing standards for blockchain security.
 - The decentralization of information frees the individual from controlling information and establishes a trusted society that can handle his or her information autonomously.

SWOT analysis of blockchain

SWOT analysis is a short form for strengths, weaknesses, opportunities, and threats and is a structured planning method that evaluates those for elements of an association, project or commerce endeavor etc.

	Strengths	Weaknesses
Internal	– Fast & low-cost money transfers – No need for Intermediaries – Automation (by means of smart contracts) – Accessible worldwide – Transparency – Platform for data analytics – No data loss/ modification/ falsification – Non-repudiation	– Scalability – Low Performance – Energy consumption – Reduced users' privacy – Autonomous code is “candy for hackers” – Need to rely to external oracles – No intermediary to contact in case of loss of users; credentials – Volatility of cryptocurrencies – Still in an early stage (no “Winning” Blockchain, need of programming skill to read code, blockchain concepts difficult to be mastered) – Same results achieved with well-mastered technologies
	Opportunities	Threats
External	– Competitive advantage (if efforts to reduce/hide the complexity behind blockchain are successful, or in case of diffusion of IoT) – Possibility to address new markets (e.g., supporting car and house sharing, disk storage rental, etc.) – Availability of a huge amount of heterogeneous data, pushed in the blockchain by different actors	– Could be perceived as unsecure/unreliable – Low adoption from external actors means lack of information – Governments could consider blockchain and smart contracts “dangerous” – Medium-term investment – Not suitable for all existing processes – Customers would still consider personal interaction important

2. Develop a globally competitive blockchain professional enterprise. (Though investment such as Accelerator and Venture Business)

WBCIA program (private investment-driven technology start-up support) select a funding team with a technology item that will lead the global market at WBCIA to foster promising start-ups. In order to provide promising start-ups with technological skills that are oriented toward the global market with opportunities for bold start-ups, successful venture-focused investment companies, early expert VCs, and large technology companies are designated as operators to match investment, technical training, and mentoring with R&D funds.

Start a business with a technology item
without the burden of failure

Share profits on growth of start-up companies
Acquire a portfolio for follow-up investments

Promote high-end technology start-ups
Create jobs

3. Training innovative blockchain professional talent. (Through CBM training, Certified Blockchain Manager)

Everything you imagine becomes an innovation. - Y.S.H(President of WBCIA) -

- Train expert personnel through blockchain manager certification test
- Creating new jobs and fostering new businesses to strengthen national competitiveness
- Publishing blockchain teaching materials and distributing on and offline education programs
- Performing and conducting research projects for multi-dimensional block chain education programs

Blockchain Professional Training & Start-up (Technical Education)

Investing in successful venture companies and mentoring experts with proven education skills to increase the chances of success.

Education space & Link various additional support

A consortium with several agencies links the start-up team with education space and support.

Enabling Start-up Challenges

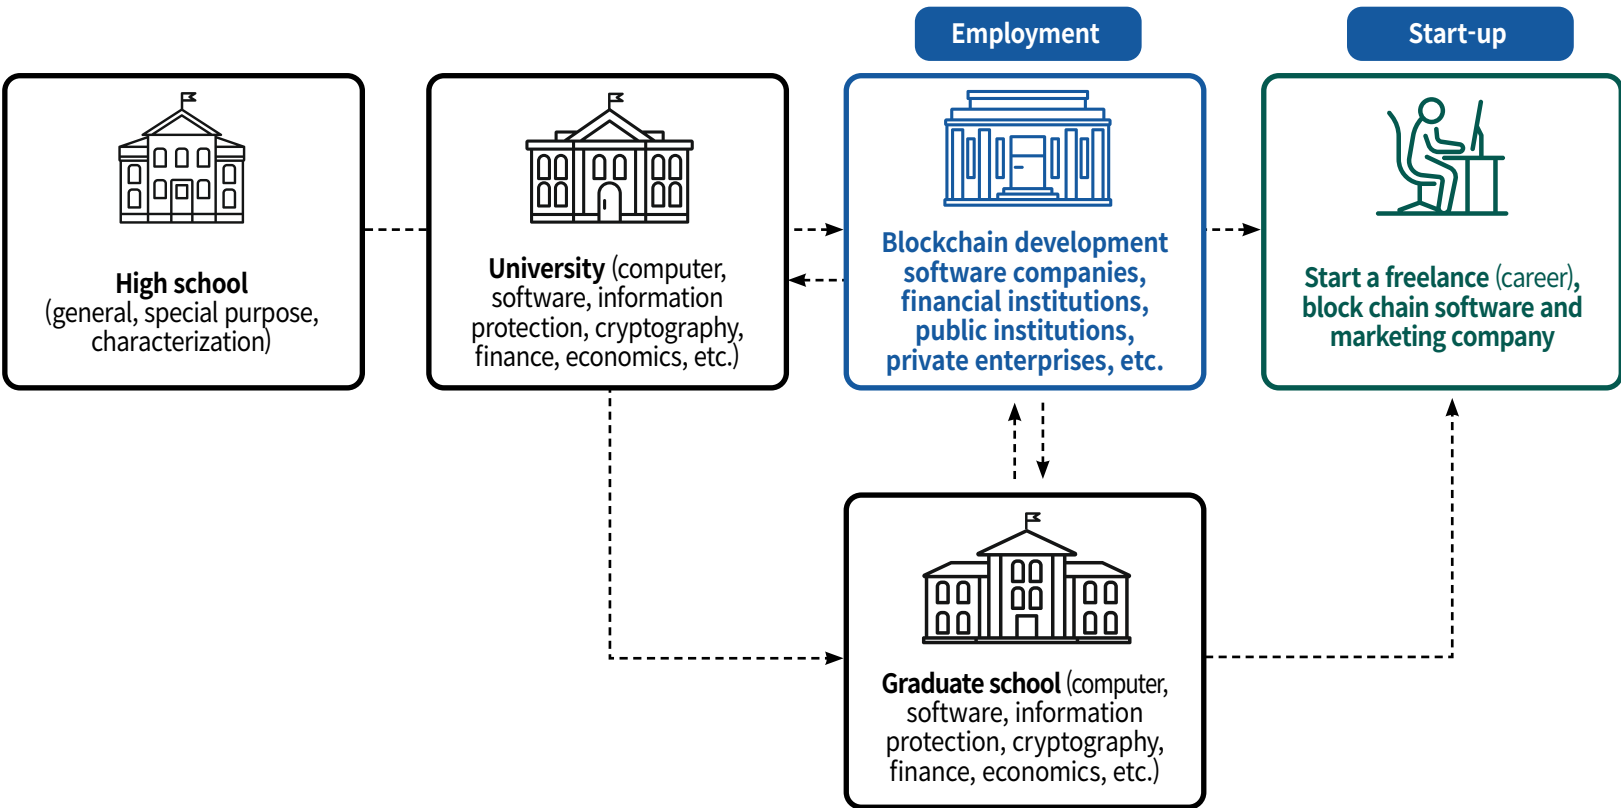

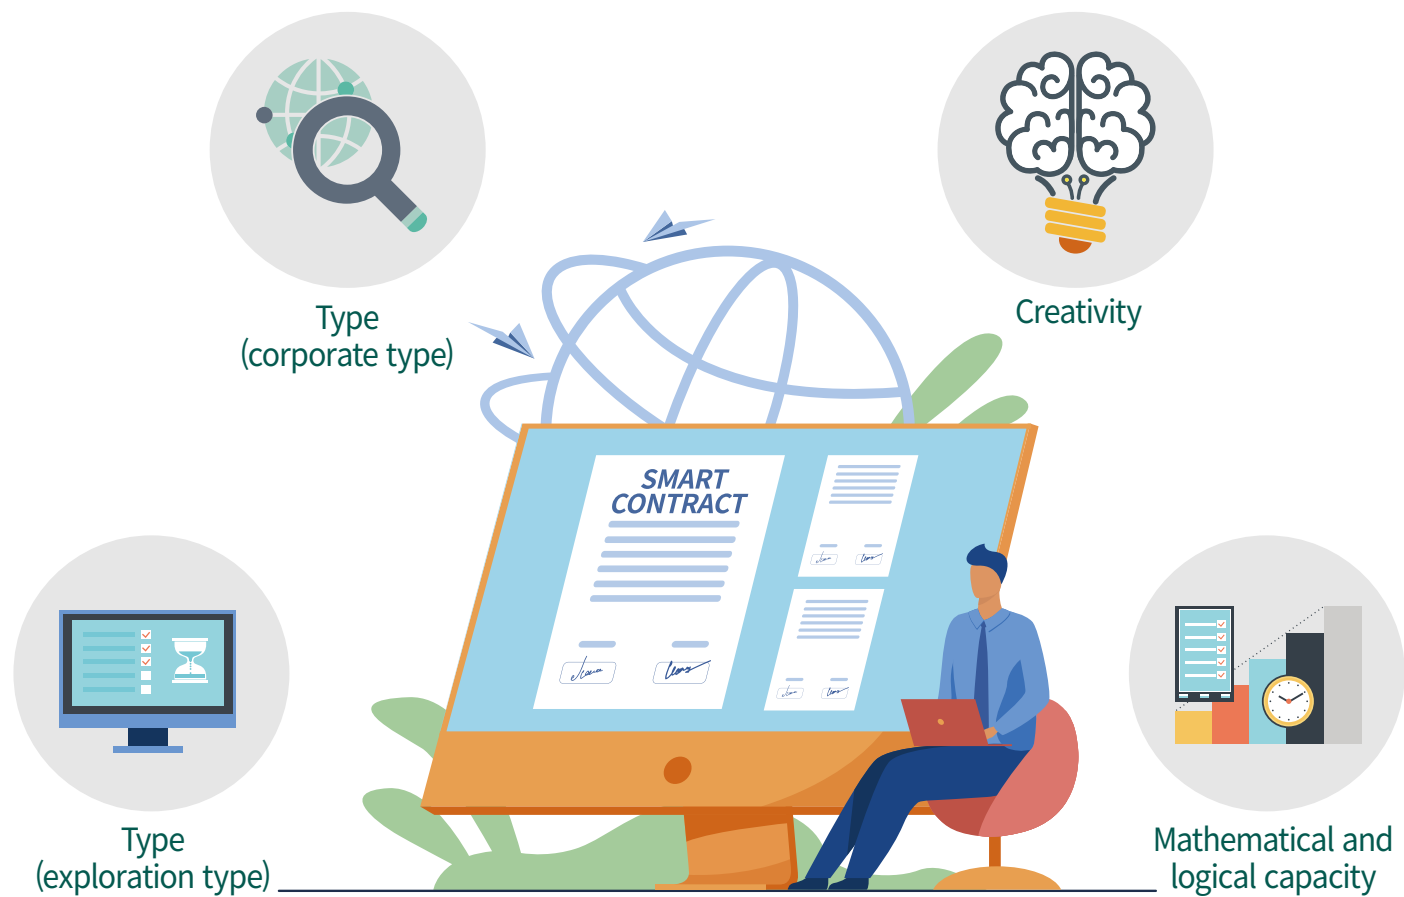

WBCIA aims to fundamentally activate the technological start-up challenge of advanced engineers who were reluctant to start their own business due to lack of start-up funds and low success rates.

Future Career CBM

Blockchain Manager (CBM)

“Explore the blockchain technology called public ledger or distributed ledger”

Certified Blockchain Manager(CBM) at a glance

Certified Blockchain Manager(CBM) career description

- ① Certified Blockchain Manager(CBM) certification is a high-end level for carrying out multidimensional block chain education program development projects and research tasks as a holder of knowledge and ability to use block chains and variously applied in industrial sites where blockchain is applied. Dissemination and evaluation of programs.

The career content is to perform duties such as office work, education, management, consulting, public relations, marketing, and sales in the blockchain field.

- ② Career contents by grade are as follows.

rank	Career description
Level 1	Certified Blockchain Manager(CBM) Level 1 career is a multi-dimensional block chain education program development project to improve national competitiveness and cultivation of block chain experts, perform technology standardization research, and educate block chain experts. The career description is to perform the career.
Level 2	Certified Blockchain Manager (CBM) Level 2 career mainly carries out the distribution and evaluation of programs that are applied in various fields in the blockchain and related industries, and education, affairs, management, consulting, public relations, and marketing in the blockchain and related industries. The career content is to perform tasks such as information protection and program development.
Level 3	Certified Blockchain manager (CBM) level 3 career mainly performs distribution and evaluation of educational programs applied in various fields of blockchain and related industries, and education, office work, public relations, marketing, and sales in blockchain and related industries. The career description is to perform the duties of

What does CBM do?

Blockchain experts find fields or industries that can utilize blockchain* technology, and design and develop software to apply them.

- ▶ We develop blockchain-based cryptocurrency*.
- ▶ We continuously improve and supplement the software so that blockchain technology or cryptocurrency can be used in real life.

* Blockchain: This is a technology that publicly records transaction details in a ledger that anyone can read and duplicates and stores it on multiple computers. Hacking can be prevented and manipulation or modification is impossible because the ledger determined by a large number of consensus is stored simultaneously by multiple computers.

* Cryptocurrency: It is an electronic money that is traded in the form of electronic information on the cyber without real objects. It is also called cryptocurrency because it is made through cryptographic technology to prevent duplication or falsification, and blockchain-based cryptocurrency is Unlike ordinary currencies issued by banks, they are valued according to rules set by the person who first developed them.

Source: 【Regulations on the management and operation of private qualifications for Certified blockchain managers (CBMs)】 Article 9 (Details of duties of Certificate holder)

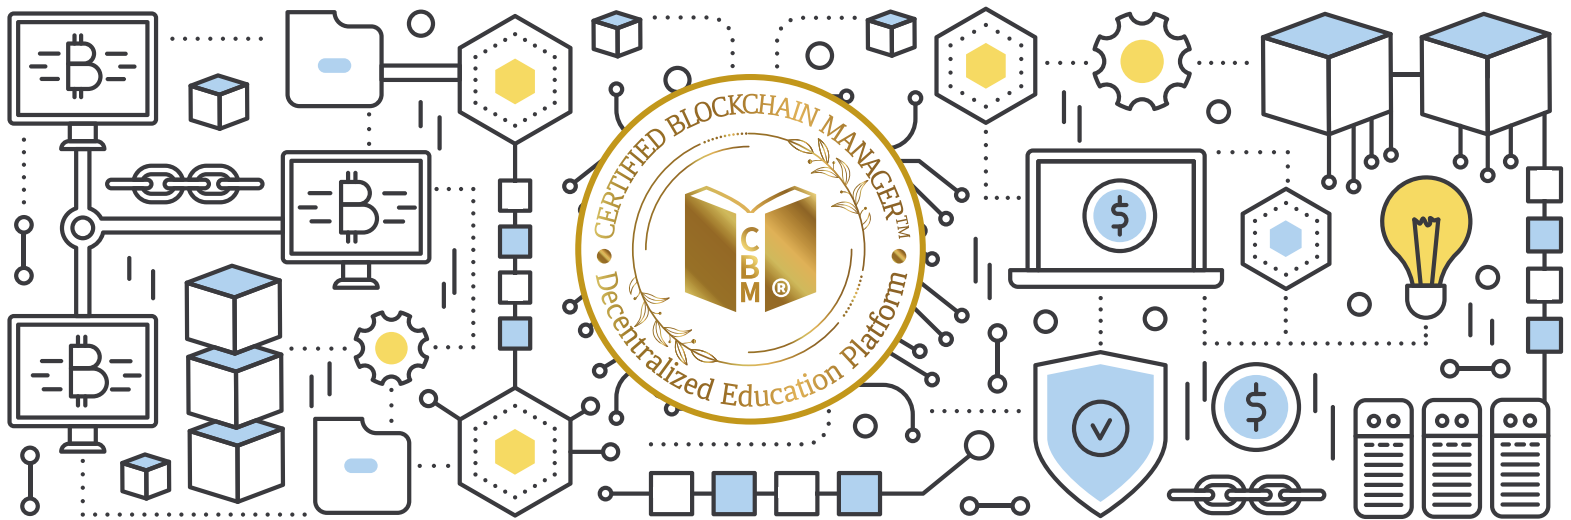

Where is CBM active?

Related occupation

Occupations that are highly related to blockchain experts include blockchain software developers, cryptographers, and information protection experts.

Field of activity

They are mainly active in the fields of finance, security, healthcare, and logistics, and will be able to work in almost all industries where blockchain technology can be applied in the future.

What aptitude and interest does CBM need?

Aptitude

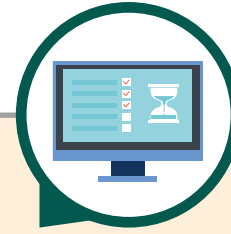

- ▶ Blockchain experts design and develop blockchain software based on their understanding of programming, so they need the ability to think systematically and logically.
- ▶ As it is necessary to analyze how to use blockchain technology to make our daily life more convenient, unique and new thinking ability is important.

Interest

Type (exploration type)

- In order to understand the contents, we make efforts such as collecting data and enjoy the process of deep exploration.
- I am curious about new things and think logically and rationally.

Type (corporate type)

- Want to influence other people's thoughts or views.
- To attempt adventure and engage in competitive activities.

Where can CBM work?

- ▶ Blockchain experts are mainly employed by software companies that develop blockchain technology.
- ▶ You can work at financial institutions such as banks, and you can also get a career at private companies and public institutions that use blockchain technology.

What is the future of CBM?

- ▶ Blockchain technology can be used in various fields such as information industry, manufacturing, distribution, society, and culture, as well as finance and transaction services. Accordingly, major developed countries are investing heavily in blockchain technology, and are also striving to develop specialized personnel for this.

Blockchain technology, which first appeared with the advent of Bitcoin in 2009, is still in the early stages of development. a lot. So in the future

In order to solve this problem, technology development, research, and investment by governments are expected to increase even more, and the demand for related jobs will also increase significantly.

Announcement of the 2021 Certified Blockchain Manager(CBM) Qualification Test

Regulations on the management and operation of private qualifications of Blockchain Management Company (CBM) and Article 22 (Public announcement and notification of the test) announce the implementation plan of Certified Blockchain Manager(CBM) in 2021 as follows. We've been preparing for it.

Global CBM qualification testing is conducted online worldwide.

The implementation plan for the 2021 Certified Blockchain Manager(CBM) qualification test is announced as follows.

Dec 1st, 2020

Y.S.H, president of the WBCIA.

1. Regular Test schedule

Enforce ment	Application period	Test Confirmation Guide	Test day	Pass announcement	Note (Qualification grade)
4th	1.1.(Fri)~1.22.(Fri)	21.1.23.(Sat)	21.1.31.(Sat)	21.2.3.(Thu)	3
5th	2.1.(Mon)~2.19.(Fri)	21.2.20.(Sat)	21.2.27.(Sat)	21.3.3.(Thu)	3
6th	3.1.(Mon)~3.19.(Fri)	21.3.20.(Sat)	21.3.27.(Sat)	21.3.31.(Thu)	2, 3
7th	4.1.(Thu)~4.16.(Fri)	21.4.17.(Sat)	21.4.24.(Sat)	21.4.28.(Thu)	3
8th	5.1.(Sat)~5.21.(Fri)	21.5.22.(Sat)	21.5.29.(Sat)	21.6.2.(Thu)	3
9th	6.1.(Tue)~6.18.(Fri)	21.6.19.(Sat)	21.6.26.(Sat)	21.6.30.(Thu)	1, 2, 3
10th	7.1.(Thu)~7.23.(Fri)	21.7.24.(Sat)	21.7.31.(Sat)	21.8.4.(Thu)	3
11th	8.1.(Sun)~8.20.(Fri)	21.8.21.(Sat)	21.8.28.(Sat)	21.9.1.(Thu)	3
12th	9.1.(Wed)~9.17.(Fri)	21.9.18.(Sat)	21.9.25.(Sat)	21.9.29.(Thu)	2, 3
13th	10.1.(Fri)~10.22.(Fri)	21.10.23.(Sat)	21.10.30.(Sat)	21.11.3.(Thu)	3
14th	11.1.(Mon)~11.19.(Fri)	21.11.20.(Sat)	21.11.27.(Sat)	21.12.1.(Thu)	3
15th	12.1.(Wed)~12.17.(Fri)	21.12.18.(Sat)	21.12.25.(Sat)	21.12.29.(Thu)	1, 2, 3

※ CBM 1st to 3rd test is being conducted in Republic of Korea.

※ The CBM qualification test is basically accepted and taken in English.

However, if there is an educational institution designated as CBM in the agreed country, you can take a national language test.

2. Qualification for test

Test grade	Qualification for test
CBM 1 st grade	[Age] not applicable, [Education] not applicable, [Nationality] not applicable, [Other] a person in the period of validity of the CBM 2nd Grade certificate
CBM 2 nd grade	[Age] not applicable, [Education] not applicable, [Nationality] not applicable, [Other] a person in the period of validity of the CBM 3rd Grade certificate
CBM 3 rd grade	[Age] not applicable, [Education] not applicable, [Nationality] not applicable

3. Regular test place

(individual notice and notice on the date of application confirmation)

Regular test place and test place address
CBM Joint Implementation Recruitment of Global Educational Institutions

※ Countries that do not have a formal CBM education institution are hosted online by the World Blockchain Industry Association (www.wbcia.io).

4. Application fee and certificate issuance fee

(Unit: CBM, price \$0.1)

Grade	Test fee		Certificate Fee	CBM Deposit address
	Written test	Practical Test		
1 st	8,000	8,000	Free online (PDF)	www.wbcia.io Announced
2 nd	8,000	8,000		
3 rd	8,000	N/A		

※ The above CBM quantity of 1,000CBM is the closing price of the day before the exchange (\$0.1).

※ The quantity of CBM based on CBM application fee payment varies in real time (see page 38).

※ CBM will be listed on Coredax Exchange (www.coredax.com) in Korea on February 5, 2021.

※ CBM application fee deposit address: : 0x70e54999CA9b8fEBe343f54b3F7a081137886EFb

5. CBM Coin Application Fee Payment Procedure

Publication and test reception	Test reception	CBM Purchase	CBM Payment	Confirmation & notification
Website Announced	KYC certification	Buy CBM after login	Published price (quantity) Send to QR address	Confirmation of confirmation mail and receipt
www.wbcia.io	www.wbcia.io	TokenCan Exchange	www.wbcia.io	www.wbcia.io

- ※ Refer to the World Blockchain Industry Association(www.wbcia.io) for detailed payment procedures.
- ※ CBM will be listed on the token can exchange(www.tokencan.com) on December 1, 2020.
- ※ World Blockchain Industry Association(WBCIA)

6. Certified Blockchain Manager(CBM) Test Schedule

Grade	Subject [Each 20 Questions]		Entrance time	Test Time	Total Point	Test Method
1, 2, 3	•Blockchain analysis and design •Blockchain Building and operating •Blockchain Service Planning		09:00	09:10 ~ 10:10	100 Point	Multiple Choice
1, 2	1 st class	•Blockchain Information Protection [Each 5 Questions]	10:20	10:30 ~ 11:30	100 Point	Short answer (Essay & summary type)
	2 nd class	•Programming [Each 1 Questions]	11:40	12:00 ~ 13:00	100 Point	Computer work type

- ※ You can check out 20 minutes after the test starts.
- ※ CBM is available online for COVID 19 prevention until further notice.
- ※ For offline tests, students of Grade 1 and Grade 2 should bring their personal laptops (CPU i5, RAM 4G or higher) and take the practical test to complete the program smoothly.

7. Acceptance criteria

Acceptance criteria

In the case of the Certified Blockchain Manager(CBM) Grade 1, Grade 2 and Grade 3, a person who scores more than 40 points in every subject and an average of 60 points or more in all subjects shall be the successful candidates. (Fall less than 40 points)

- ※ For Grade 1 and Grade 2 tests, if only one of the written or practical tests is passed, the written or practical test that has passed only three consecutive times shall be exempted. (However, the test fee will be incurred.)

- ※ Among those who fail the written or practical test, only those who score an average of 60 or more out of 100 will be exempted from the test three times in a row. (However, the test fee will be incurred.)
- ※ If a person who passes grade 2 or 3 of Certified Blockchain Manager(CBM) takes the promotion test, he or she must pay a separate fee for the promotion test and take the promotion test.

8. Reception methods, submission documents, etc.

Sortation	Content	Note
Application	•From 00:00 to 24:00 the application deadline	•From 00:00 to 24:00 during the application period
Online reception place	•WBCIA •www.wbcia.io	•Recruitment of global educational institutions.
Payment method	•CBM coin 	•www.coredax.com > CBM Purchase •Remittance as much as the test fee to an address dedicated to CBM
Send confirmation mail	•WBCIA •www.wbcia.io	•Send a confirmation email
Online Submitted documents	•Photo file: 276×354 pixels or more ※ 3cm×4cm and larger than 200 dpi ※ When scanning ID photos, set a minimum resolution of 200 dpi (600 dpi or higher is recommended) •Passport copy file (for KYC certification)	•Application form: One page preparation (Upload 1 photo 3x4cm) •Consent to the purpose of collecting and using personal information

9. Precautions for Applications

- I. The CBM qualification test is basically accepted and taken in English.
(However, you can apply for your own language according to the countries of the agreement.)
- II. Until further notice, CBM will be implemented online following the COVID 19 quarantine guidelines. (However, it can be carried out offline in compliance with the national COVID 19 quarantine guidelines.)
- III. You will not receive additional applications after the application deadline, so please make sure to register within the application period.
- IV. The applicant shall be responsible for any disadvantages caused by errors, omission, inability to contact, or non-qualification of the applicant's application, etc.
- V. The application form is not returned. If you cancel the application, please fill out and register the application form, including cancellation of the application and refund of the training fee, and the application fee will be refunded according to the criteria for refund of the application fee.

10. Presentation of successful applicants and application for granting certificates

I. Successful applicants can be identified in the following ways:

- ◇ The website of the World Blockchain Industry Association (www.wbcia.io)
- ◇ Cell phone text (SMS) or e-mail entered at the time of application application.

II. A cheater or a person who falls under disqualification shall not be granted a license.

- ※ At the time of the test, those who have a reason for disqualification will be canceled even if the reason for disqualification expires.

III. Online scoring is done electronically by LMS.

IV. If the documents submitted after the successful candidate's announcement are not true or the reason for disqualification is found, the acceptance shall be cancelled.

V. You can check your acceptance at the World Blockchain Industry Association (www.wbcia.io) from the date of the announcement of the successful applicants, and you can also check the official website of the educational institution designated by the country of agreement.

VI. All levels of Certified Blockchain Manager(CBM) certificates will be sent to the examinee's own e-mail (PDF).

The image displays three sample certificates for the 'CERTIFIED BLOCKCHAIN MANAGER' program, issued by the World Blockchain Industry Association (WBICA). Each certificate is for a different level of certification: MASTER, EXPERT, and CORE. The certificates are structured as follows:

- Certificate 1 (MASTER):**
 - Title:** CERTIFIED BLOCKCHAIN MANAGER™
 - Level:** Verified Certification MASTER
 - Holder Information:** Surname: GENESIS, Given name: BLOCK, Nationality: Kingdom of Spain, Grade: CBM 1st Level, Date of Acceptance: Jun 30th, 2021.
 - Signature:** Only Signed by [Signature]
 - Official Seal:** CBM® (Blockchain Manager) and WBICA (World Blockchain Industry Association).
 - QR Code:** Check Original
 - Footer:** 21-CBM-1000-ESP, License Number, Effective: 2021, 06, Expiry: 2023, 06. © 2018 - 2021 World Blockchain Industry Association. All rights reserved.
- Certificate 2 (EXPERT):**
 - Title:** CERTIFIED BLOCKCHAIN MANAGER™
 - Level:** Verified Certification EXPERT
 - Holder Information:** Surname: GENESIS, Given name: BLOCK, Nationality: Kingdom of Spain, Grade: CBM 2nd Level, Date of Acceptance: Mar 31st, 2021.
 - Signature:** Only Signed by [Signature]
 - Official Seal:** CBM® (Blockchain Manager) and WBICA (World Blockchain Industry Association).
 - QR Code:** Check Original
 - Footer:** 21-CBM-2000-ESP, License Number, Effective: 2021, 03, Expiry: 2023, 03. © 2018 - 2021 World Blockchain Industry Association. All rights reserved.
- Certificate 3 (CORE):**
 - Title:** CERTIFIED BLOCKCHAIN MANAGER™
 - Level:** Verified Certification CORE
 - Holder Information:** Surname: GENESIS, Given name: BLOCK, Nationality: Kingdom of Spain, Grade: CBM 3rd Level, Date of Acceptance: Mar 31st, 2021.
 - Signature:** Only Signed by [Signature]
 - Official Seal:** CBM® (Blockchain Manager) and WBICA (World Blockchain Industry Association).
 - QR Code:** Check Original
 - Footer:** 21-CBM-3000-ESP, License Number, Effective: 2021, 03, Expiry: 2023, 03. © 2018 - 2021 World Blockchain Industry Association. All rights reserved.

CBM Coin

All currencies, as well as cryptocurrency, should be secured against value when issued. Otherwise, no one can trust the issued currency and is not used in the real world. Also, if specific values are not guaranteed, the issuing entity will fall into a moral hazard of issuing additional currency recklessly, causing inflation, which means a sharp decline in the value of the currency. In 1944, the U.S. used the U.S. dollar as a key currency for gold through the Bretton Woods Conference, and each country issued individual currencies in exchange for holding dollars. In 1971, the U.S. gave up the exchange of gold and money because it could not hold gold equivalent to the dollar. Instead, it uses methods that allow it to use only the U.S. dollar as a means of oil settlement in the Middle East, resulted in various evils in issuing excessive dollars.

In order to overcome the problems of existing legal currency, various cryptocurrency have already emerged for the purpose of being used in the real world, but since the intrinsic value of the cryptocurrency is not guaranteed yet, the price has fluctuated heavily according to investors' expectations. This is because a new means of cryptocurrency has been developed, but the original characteristics of the currency have been overlooked. Cryptocurrency is also a kind of currency, and there must be goods or services that can guarantee its value.

CBM Coin guarantees online/offline education services and blockchain certificates in value. Therefore, those who own CBM coins can be guaranteed by activating blockchain-related on-line, offline education services and certificates. With the value of blockchain education and certificates as collateral, stable coin prices can be maintained, and there is the advantage of being able to provide services flexibly even if coin holders increase rapidly.

So why do customers who pay in cash, like the traditional method, have to have a CBM coin? In the case of legal currency, inflation of money is bound to occur and its value will inevitably decline over time. On the other hand, CBM Coins can expect a potential rise in value, particularly in the early days of issuance, where they are given preferential treatment to enjoy offline education and certificate applications, which come at a lower cost than cash payments. It will use a certain percentage of the profits gained through on- and off-line education and certificates to keep the coin in place, increasing the value of the coin in the long term.

Since CBM Coins were issued with real services as collateral, objective verification is possible. This can be seen as having differentiated value as a cryptocurrency that has specialized business models of business.

What is Decentralized for CBM?

The certificate of the CBM qualification test will be a member of the platform and will take steps such as setting, correcting, and verifying the problems of the qualification test. Rather than giving all questions to WBCIA, successful applicants of CBM become test takers and decide the difficulty of the questions themselves and submit them through the above process. As theoretical blockchain technology is continuously updated, the purpose of the platform is

to modify and supplement the distributed/defined integrated learning content in various fields. This consequently means that the level at which qualifications can be interpreted and applied to industrial sites is consistent with the difficulty of the problem.

User Benefits Optimized for Defi

Users can settle the inconvenience of having to pay with existing credit cards or cash with CBM coins, providing consistency and convenience of the license to users who want a global license without being affected by their respective payment systems.

Of course, it can be used by credit card or account transfer. However, customers who want to use most of the lectures can use CBM coins at a more discounted price for payment. Users may hold CBM coins for investment purposes or give gifts such as gift certificates to friends or acquaintances.

In particular, CBM coins can be used as a valid learning motivation tool for online smart learning, allowing users to continue to learn and enhance their learning ability and value.

Operator & Investor's Benefit

The licensee provides online lecture and offline course services on the CBM Coin business network. CBM Coin business networks enable you to reduce unnecessary marketing and advertising costs and expand potential customers.

Based on CBM coin that is owned by an investor, actual services such as test materials, video lectures, offline incubation process, and test application are guaranteed as collateral. In addition, as the business network of CBM coin expands, the value of CBM Coins can be expected to increase as users increase and demand of CBM Coins increases. Investors can immediately cash in through the current CMB Coin-listed Cryptocurrency Exchange, and the more CBM-listed exchanges expand, the faster liquidity supply is possible without worrying about the exchange rate.

Changes in CBM test fees following changes in CBM coin prices change

We have learned so much through the rapid changes in the coin ecosystem in the past few years. We can easily find countless coins that have fallen below the starting price since they were listed on the exchange and are being forgotten in the market. Even if the CBM coin falls below the initial listed price (now \$0.01) with a probability of one millionth of one millionth, it has been fixed to receive an examination fee of 10,000 CBM at the beginning.

It is for CBM candidates and for CBM investors.

The CBM price then leaves only two cases where it can stop or rise at \$0.01. However, after 13 rounds of tests on CBM certificates, many people found that they preferred CBM certificates. There is also a successful case in which a person with a CBM license got a job at a global block chain company. In addition, it is time for real proven block chain experts to work in the block chain ecosystem and foster the block chain industry. Now, by relieving psychological anxiety caused by the volatility of coin prices and looking at the CBM test fee change schedule

(see page 38), prospective test takers of CBM can check the CBM test fee for real-time price changes and pay for the test fee.

Compensation for CBM final successful applicants paid with CBM coins

In the East, there is a saying that education is a “big plan for a hundred years to come.” Blockchain education is essential if the blockchain industry tries to continue to develop, and the concept of compensation must be accompanied by those who challenge CBM certificates through fighting with themselves at the forefront of the education.

Coins of CBM coins paid to final successful applicants of CBM certificates (applications) 20% of CBM will be compensated by CBM coin address that was submitted when receiving the test. After all, these rewards are motivated to pass the CBM and the trade bow of the CBM coin. It is believed to contribute to the torch. In addition, for the purpose of CBM certification test fees, All CBM coins used will be subject to coin (80% of the application CBM) incineration process. As more CBM applicants take certification tests, the net value of CBM can eventually be increased. In summary, it is as follows.

N: Candidates for CBM monthly

N1: Final successful candidate of CBM per month. N2: N-N1

Q: 80% of the CBM test fee for N = CBM incineration amount

Q1: 20% CBM fee for N1=CBM acceptance compensation*

Q2: 20% CBM fee for N2=CBM acceptance compensation*

Benefit 1.

20% acceptance compensation for CBM fees paid by successful CBM passers-by

Benefits 2.

Distribute the quantity of CBM equivalent to Q2 to successful applicants

*Payments from Q1 and Q2 will be sent to the address of the CBM wallet of the successful applicants in batches on the day of the acceptance announcement.

$$\therefore \alpha = Q2/N1, \beta = \alpha \times \$$$

* See page 38 for α and β .

* In the case of a reward CBM (20% of the application fee), it is applicable to a test taker who paid the CBM application fee with CBM coin only.

President & Organization

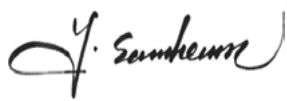

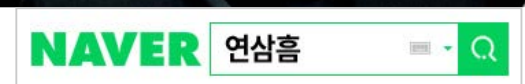

Everything you imagine becomes an innovation.

Hello? Welcome all over the world who are reading the CBM white paper. Certified Blockchain Manager (CBM) did not come out one morning. In Korea, an IT powerhouse, we successfully completed the 11th test on September 26, starting with the first test for blockchain managers on August 31, 2019.

It is a certification that has given hope to many people by changing it to an online test due to COVID-19, which no one expected in the meantime. This experience of success was possible because I had the support and encouragement of many people who are trying to go a path no one has ever gone. I would like to express my deep gratitude for renting this place. I'll always be awake, one by one, to make a better world with CBM with you all around the world. I'll be with you from where I can see and where I can't see so that we can be a page of great memories in the history of the blockchain.

WBCIA President

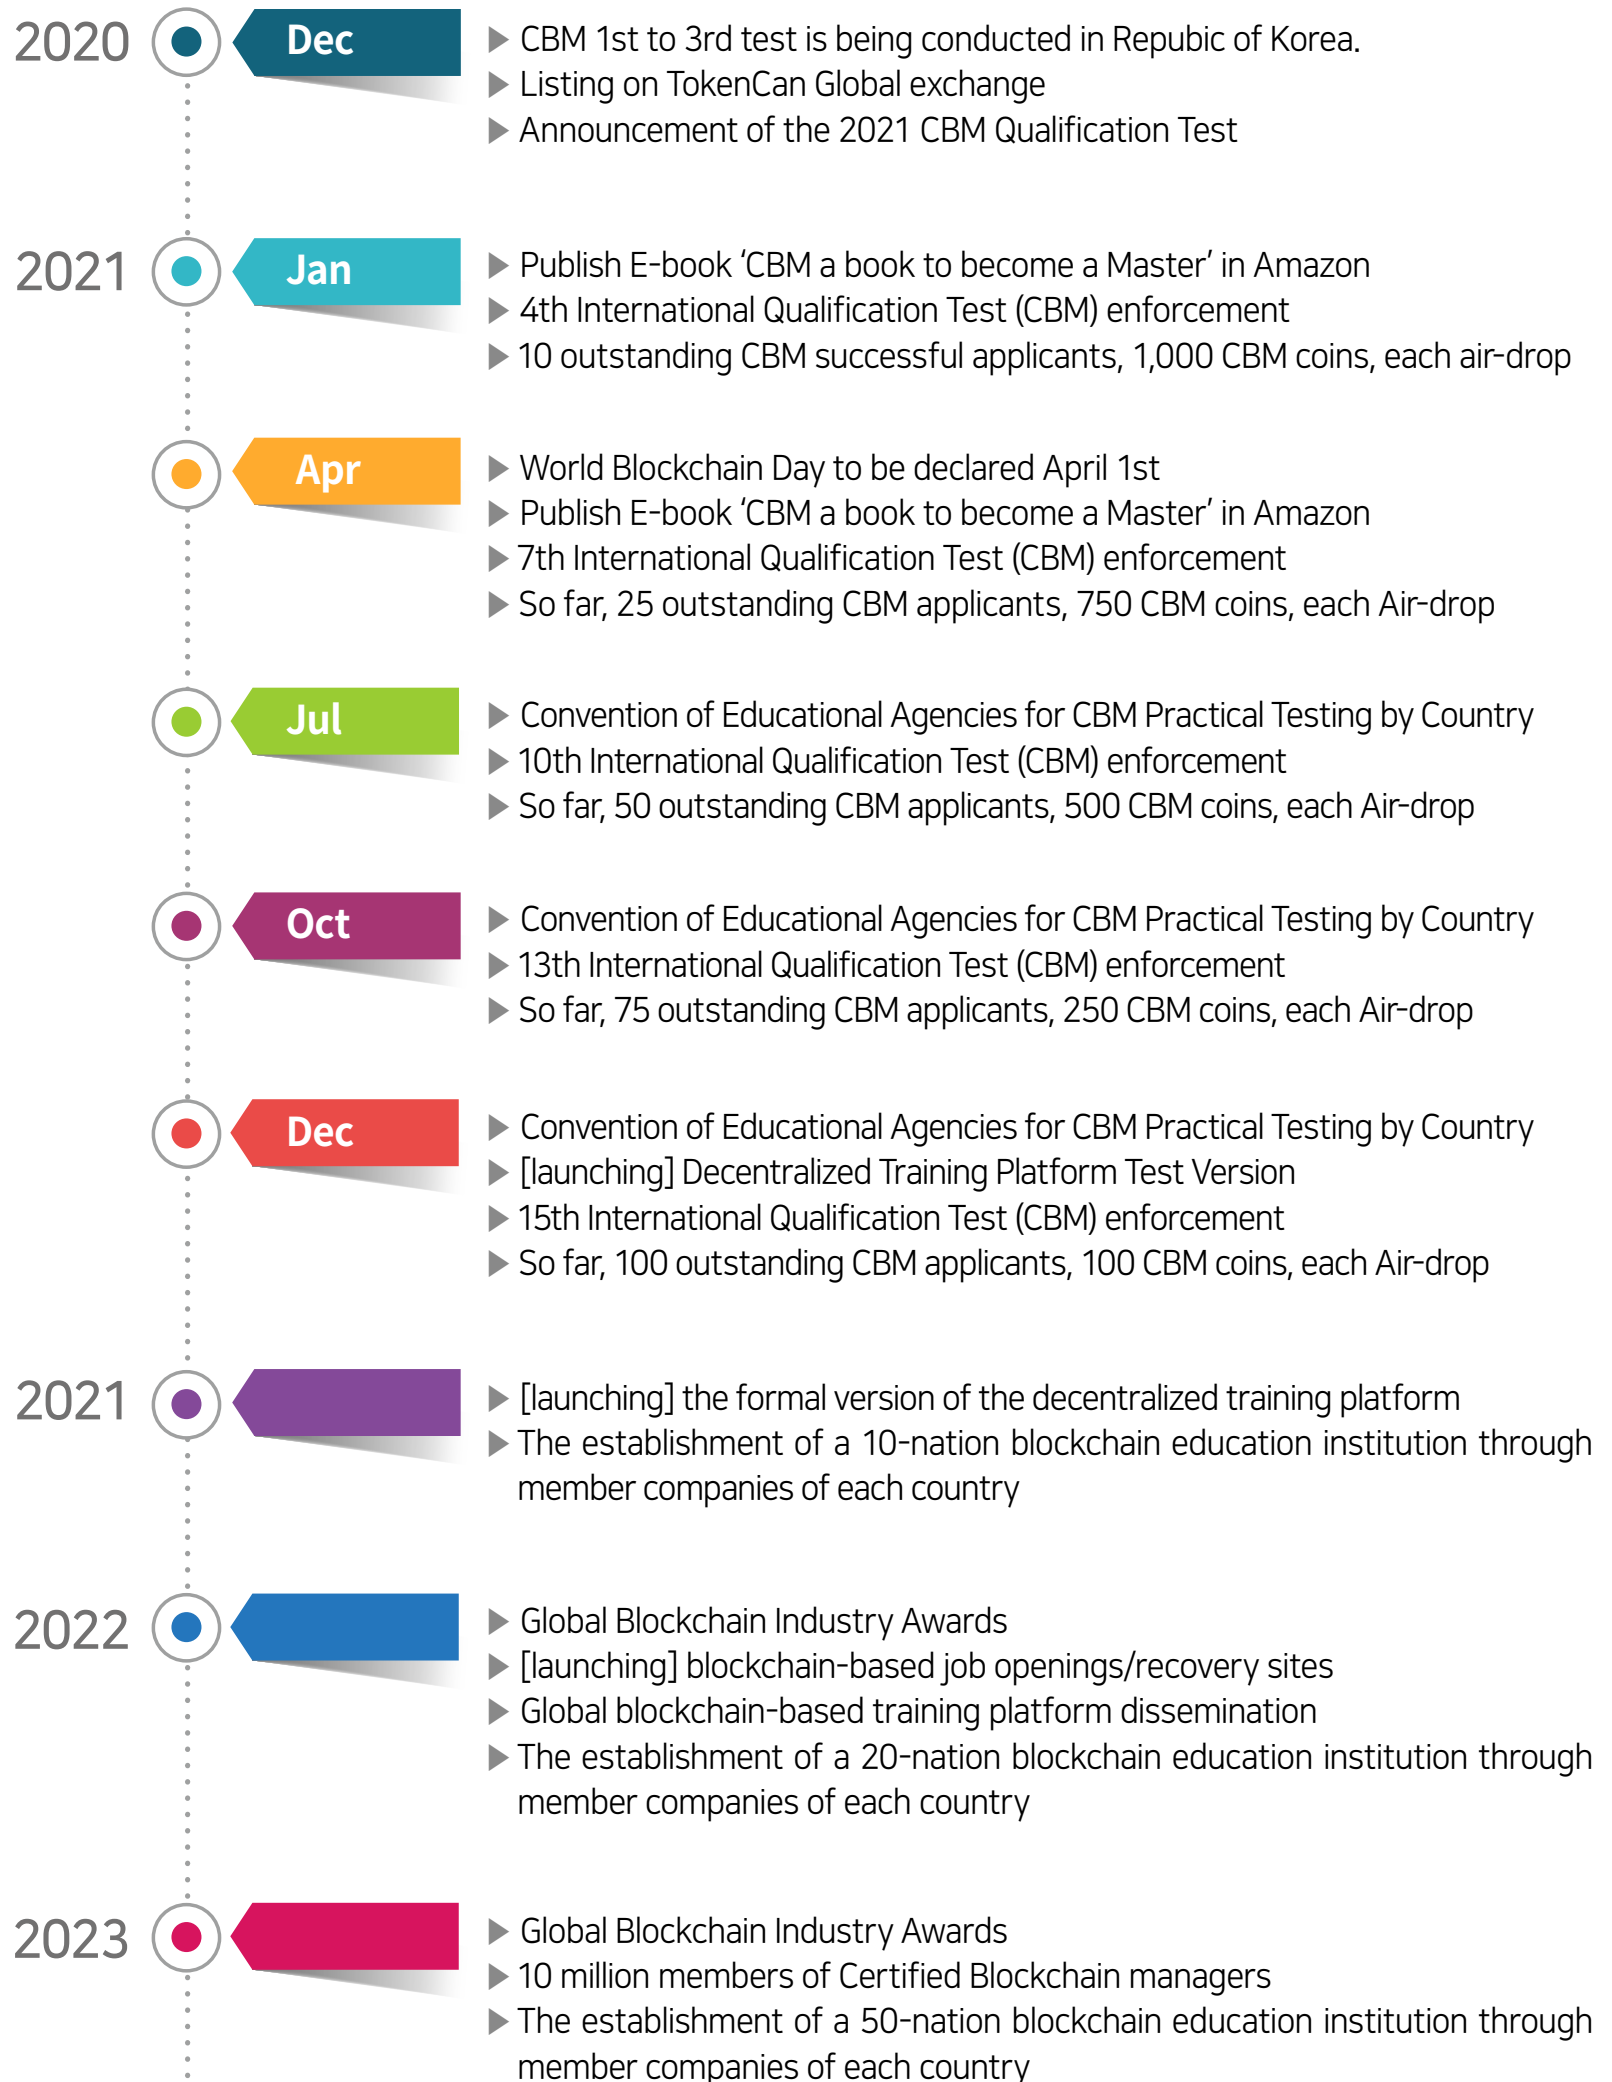

Yeon Sam-Heum

Organizational Structure

Road Map

White Paper Notice

General Notice

1. Purpose of White Paper

This white paper describes the overall contents of the CBM project, a blockchain technology-based platform that the WBCIA is preparing. This white paper has been distributed for reference purposes only in connection with CBM projects as of the time of preparation and may be modified in the future. This white paper clearly implies that it is not intended to recommend CBM Coin's purchase or investment proposals. Accordingly, the CBM project team will not be liable for damages, compensation or other responsibilities in the event of other financial damages, such as harms, losses, or liabilities, arising out of reference to this white paper.

2. Project Roadmap

The WBCIA may change the content of the White Paper, including project conclusions, schedules and achievements planned in the roadmap, at any time in a flexible manner for the successful progress and completion of the project.

3. The Decision for a Sponsoring

Sponsors should refer to Sponsors' decisions based on the latest English-language white paper provided by WBCIA, and are not limited to White Paper. If the decision to sponsor is made by reference to this white paper, responsibility for the consequences (benefits or losses) of the applicable laws shall be solely determined by the parties, and WBCIA shall not be liable for collateral, indirect or consequential damages.

4. Obligation to Sign a Contract

No one is obligated to sign a contract or legally binding covenant relating to the sponsorship of CBM project and not participate solely on the basis of this white paper. The sponsorship of CBM Coin will be issued under this legally binding agreement and the details will be provided separately from this white paper. In the event of a discrepancy between the contract and the contents of this white paper, the contract shall take precedence.

5. Characteristics of White Papers

This white paper was not provided in the business plan, business description, proposal, etc. and shall not be construed as an investment proposal or recruitment, including securities (In the case of U.S, it includes the securities and other securities prescribed in the Capital Market and Financial Investment Business Act), units of business trusts or collective investment planning units in the U.S and in any jurisdiction, nor shall the whole or part of this document may not be reproduced, distributed, or otherwise propagated under the regulatory or prohibited jurisdiction of the coin/ token publication method specified in this white paper.

6. The Final Version

Note that this white paper reflects the latest information based on cover date and is not the final version. The information contained in this document, including the business operation and financial status of the CBM project, is subject to change and may be updated irregularly. WBCIA does not guarantee that the content of the white paper will not change in the future if it conflicts with versions of English, Chinese, Russian, German, Japanese, Vietnamese, Korean and other languages, and replaces the original English language. When a new version of the white paper is released, it will be posted on the official website (<http://wbcia.io>)

Anti-money Laundering/Counter Terrorist Financing Policy

1. Necessity needs for Anti-money Laundering/Counter Terrorist Financing Policy

The WBCIA is responsible for policies to prevent money laundering and counter terrorist financing, and detailed identification of anyone that wants to own CBM Coin or use it as a payment method is mandatory. Depending on the circumstances of each application, the company may request additional information and/or documents from the sponsor from time to time.

2. Duty to cooperate in Anti-money Laundering/Counter Terrorist Financing Policy

The WBCIA promises to comply with all applicable guidelines applicable to the Business in respect of AML-CFT obligations to any applicable or anticipated future application. The Company has all right to exclude anyone who refuses to provide adequate information and/or documentation that the Company may request while in the initial coin sponsorship and/or CBM Coin additional sponsorship.

3. WBCIA's obligation to cooperate in the Anti-money Laundering/Counter Terrorist Financing Policy

The WBCIA may also have an obligation to report all suspicious transactions to the Financial Intelligence Unit and other relevant agencies on a regular basis, and shall have the right to refuse to provide coins to designated individuals and corporations.

CBM SNS

To promote CBM certification, we recruit global staff to operate and manage the above CBM community (other active SNS) together as follows.

Qualification: Anyone interested in a CBM certificate Nationality: Not applicable.

Gender: Not applicable.

Age: Not applicable.

Recruitment: Not more than 10 persons per country

Interview: Final Interview through 'Zoom'(Only those who pass the first round)

How to Support: <http://wbcia.io> > CBM > Support for CBM SNS staff

Interview Date: Mutual Consultation

(Interview languages are based on English. Applicants can speak their own language if necessary)

Benefits:

1. All application fees incurred until CBM 1st grade pass are free.
2. Providing WBCIA recommendations when employed by related companies
3. Preferring CBM to WBCIA when requesting CBM recruitment
4. Preferred recruitment after agreement with CBM educational institutions in supported countries

附录

CBM® 资格表格使用指南

1. CBM® 资格表格通用规则

1. CBM® 资格标志 CBM, CERTIFIED BLOCKCHAIN MANAGERTM, CBMR 应按本说明书使用。
2. CBM资格认定WBCIA(World Blockchain Industry Association:世界区块链产业协会)在爱沙尼亚以外的地区拥有对 CBM资格标志的垄断性、绝对性和排他性权利, WBCIA是 CBM资格标志专用使用权人。
3. CBM 资格证书与 WBCIA 所有 CBM 资格证书相似, 不使用或宣传任何可能引起混淆的标志。
4. CBM 资格人员对于资格表及相关营业权, 任何妨碍或阻碍WBCIA权利的行为, 均不直接或尝试或助长。
5. CBM 资格者还需遵守WBCIA的保守教育、更新申请书上的资格标志相关条件。

2. CBM® 资格表格基本使用规则

1. CBM® 基本使用规则

- (1) 必须经常以大写形式使用。
- (2) 字之间不得标示省略点
- (3) 必须经常使用"®"符号作为胃尖子。
- (4) 必须经常使用"资格证书(certificant, professional, practitioner)"、"资格认证(certification)"、"资格证书(mark, certification mark, marks, certification marks)"等WBCIA认可的名词形容词。

2. CERTIFIED BLOCKCHAIN MANAGER™ 基本使用规则

- (1) 必须经常使用大写字母(可混用大写和小写字母)。
- (2) 必须经常使用"TM"符号作为上标。
- (3) 必须经常使用"资格证书(certificant, professional, practitioner)"、"资格认证(certification)"、"资格证书(mark, certification mark, marks, certification marks)"等WBCIA认可的名词形容词。

3. 基本使用规则

- (1) 必须同时使用组成标志的三个要素。
(图书模样标记, "CBM"及"®")
- (2) 商标必须经常从插图原件复制
- (3) 不得改变或修改标志。

3. CBM® 资格表格的基本使用方法

1. CBM® 资格商标均以大写字母标记, 字间不标示省略点。

正确用法:

Samheum Yeon, CBM®

Eugene Sam, CBM®

错误的用法:

Samheum Yeon, C.B.M.®

Eugene Sam, C.B.M.®

Samheum Yeon, cbm®

Eugene Sam, cbm®

2. 在印刷品上首次出现的 CBM® 资格商标中, 应将 ® 作为上标。

正确用法:

延三钦是区块链专业 CBM® 的资格者。他和另外5名 CBM 资格证一起工作。

Eugene Sam is a CBM® professional specializing in Blockchain. There are five other CBM professionals working in his office.

错误的用法:

延三钦是区块链专业CBM的资格。他与另外7名 CBM 资格要员一起工作。

Eugene is a CBM professional specializing in Blockchain. There are seven other CBM professionals working in his office.

3. The CBM® 资格商标不得用作 CERTIFIED BLOCKCHAIN MANAGER™ 资格商标的插入式缩写。

正确用法:

延三钦是CBM®资格者, 即CERTIFIED BLOCKCHAIN MANAGER™ 资格者。

Sam is a CBM® practitioner or CERTIFIED BLOCKCHAIN MANAGER™ practitioner.

错误的用法:

延三钦是CERTIFIED BLOCKCHAIN MANAGER™ (CBM®) 资格者。

Eugene is a CERTIFIED BLOCKCHAIN MANAGER™ (CBM®) practitioner.

4. CBM® 资格商标应经常以经批准的适当名词的形容词形式使用。

CBM® 资格商标总是使用"资格者(certificant, professional, practitioner)"、"资格认证(certification)"、"资格商标(mark, certification mark, marks, certification marks)"等WBCIA认可的适当名词的形容词形式。

正确用法:

延三钦是 CBM® 的资格

Eugene is a CBM® practitioner.

延三钦取得了 CBM® 资格认证。

Eugene has obtained his CBM® certification.

错误的用法:

延三钦是 CBM®。

(除了上述正确用法所允许的情况以外, 均有错误表达)

Eugene is a CBM®。

5. CBM® 资格商标不得用于复数型或所有型。(仅英文)**正确用法:**

Eugene Sam and Eugenia Sam are CBM® certificant.

The CBM® professionals' seminar was sold out.

错误的用法:

Eugene Sam and Eugenia Sam are CBMs®。

The CBMs' seminar was sold out.。

6. CBM® 资格标志不得作为域名或电子邮件地址的一部分。**正确用法:**

eugen sam@gmail.com

www.eugen samblockchain.com

错误的用法:

eugen samcbm@gmail.com
www.eugen samcbm.com

4. CERTIFIED BLOCKCHAIN MANAGER™ 资格标识使用方法

1. CERTIFIED BLOCKCHAIN MANAGER™ 资格商标应经常使用大写字母 (大写与小写可混用)

正确用法:

延三钦是 CERTIFIED BLOCKCHAIN MANAGER™ 的资格者。

Sam is a CERTIFIED BLOCKCHAIN MANAGER™ practitioner.

延三钦是 CERTIFIED BLOCKCHAIN MANAGER™ 的资格者。

Sam is a CERTIFIED BLOCKCHAIN MANAGER™ professional.

错误的用法:

洪吉童是 certified blockchain manager™ 的资格者。

Eugene is a certified blockchain manager™ practitioner.

延三钦是 Certified Blockchain Manager™ 的资格者。

Eugene is a Certified Blockchain Manager™ professional.

2. CERTIFIED BLOCKCHAIN MANAGER™ 资格商标不得作为 CBM® 资格商标的插入式全文使用。

正确用法:

延三钦是 CERTIFIED BLOCKCHAIN MANAGER™ 资格者, 即 CBM® 资格者。

SAM is a CERTIFIED BLOCKCHAIN MANAGER™ professional or CBM® professional.

错误的用法:

延三钦是 CBM® (CERTIFIED BLOCKCHAIN MANAGER™) 资格者。

SAM is a CBM® (CERTIFIED BLOCKCHAIN MANAGER™) professional.

3. CERTIFIED BLOCKCHAIN MANAGER™ 资格商标应经常被批准, 以适当名词的形容词形式使用。

CERTIFIED BLOCKCHAIN MANAGER™ 资格商标经常是"资格认证(certificant, professional, practitioner)"、"资格认证(certification)"、"资格证书(mark, certification mark, marks, certification mark)"等。

正确用法:

延三钦是 CERTIFIED BLOCKCHAIN MANAGER™ 的资格者。

Eugene, CERTIFIED BLOCKCHAIN MANAGER™ professional.

延三钦获得了 CERTIFIED BLOCKCHAIN MANAGER™ 资格认证

Eugene has obtained his CERTIFIED BLOCKCHAIN MANAGER™ certification.

错误的用法:

(韩文表达方式除以上正确用法所允许的情况外均有错误)

Eugene, CERTIFIED BLOCKCHAIN MANAGER™ blockchain advisor.

Eugene, CERTIFIED BLOCKCHAIN MANAGER™ advisor.

Eugene, CERTIFIED BLOCKCHAIN MANAGER™ licensee.

4. CERTIFIED BLOCKCHAIN MANAGER™ 资格商标不得采用复数型或所有型。(仅英文)**正确用法:**

Jane Doe and John Doe are CERTIFIED BLOCKCHAIN MANAGER™ certificants.

The CERTIFIED BLOCKCHAIN MANAGER professionals' seminar was sold out.

错误的用法:

Jane Doe and John Doe are CERTIFIED BLOCKCHAIN MANAGERS™.

The CERTIFIED BLOCKCHAIN MANAGER'S™ seminar was sold out.

5. CERTIFIED BLOCKCHAIN MANAGER™ 资格标志不得作为域名或邮箱地址的一部分使用。**正确用法:**

johndoe@gmail.com

www.johndoeblockchain.com

错误的用法:

idcertifiedblockchainmanager@gmail.com

jdcoe@certifiedblockchainmanager.com

www.jdcertifiedblockchainmanager.com

5. 资格表格使用方法

1.  资格商标由图书模样标志、“CBM”文字及“®”三个要素构成。这三个组成要素应经常作为一个单位一起使用，以保存商标的视觉完整度。

正确用法:

错误的用法:

®不能没有就使用。

没有书样标志是不可以使用的。

不能只单独使用书样标志。

不能分离图像元素

2. 复制  资格商标时，应从WBCIA提供的原件插件中复制。在任何情况下都不能变更或修改  资格商标、用手画或排版(typeset)，也不能歪曲形态或变更等低级品质的复制或电子扫描。

错误的用法:

各要素别的大小比例不得变更。

未经批准，不得生削复制。

不能使用低水平的克隆技术。

不得修改资格商标。

3. 资格商标要与获得WBCIA资格认证的个人有明确的联系。

正确用法:

Samheum Yeon, CBM®, CAM, CEM

Samheum Yeon, CBM®

Samheum Yeon, CBM®, CAM

John A. Doe, CBM®, CAM, CEM

John A. Doe, CBM®

John A. Doe, CBM®, CAM

错误的用法:

未与获得资格认证的个人联系

BLOCKCHAIN COMPANY NAME Corp.

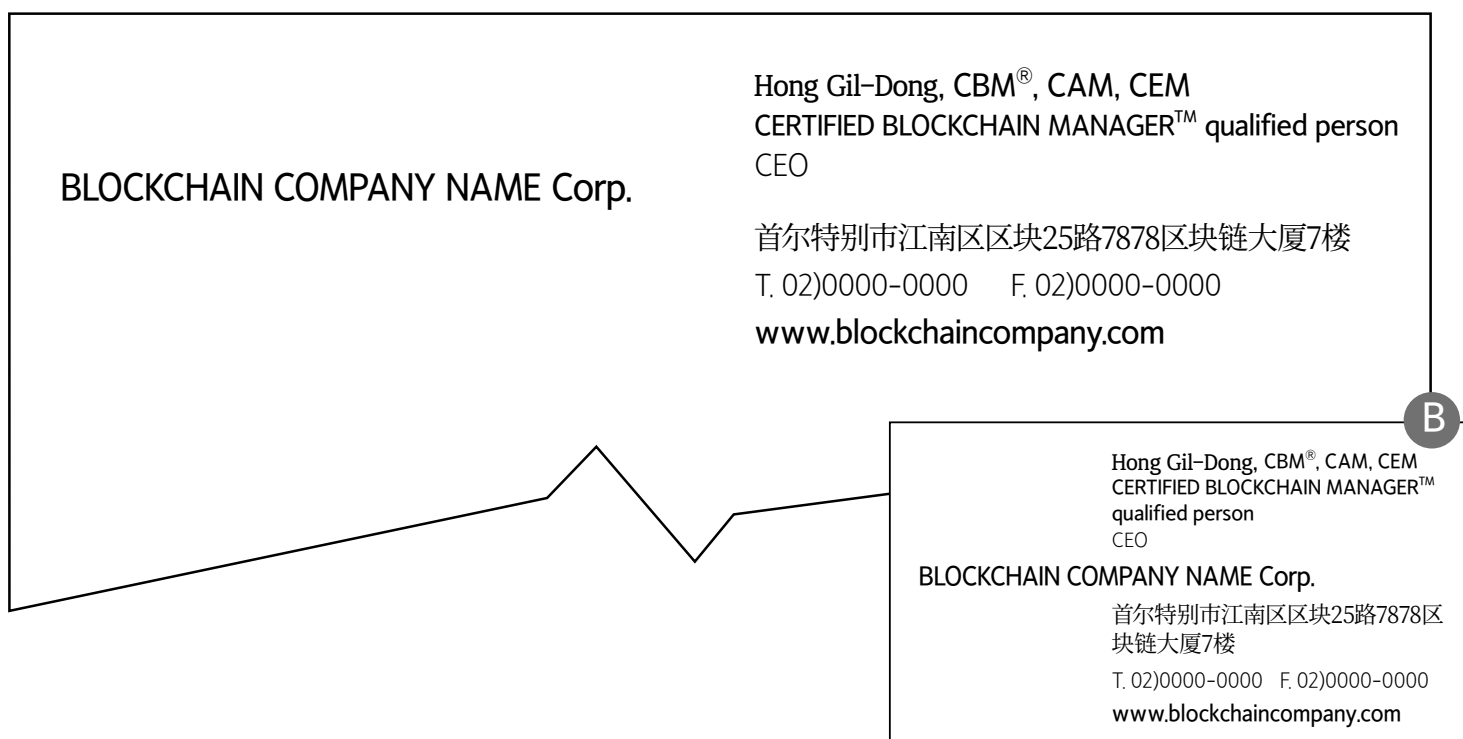

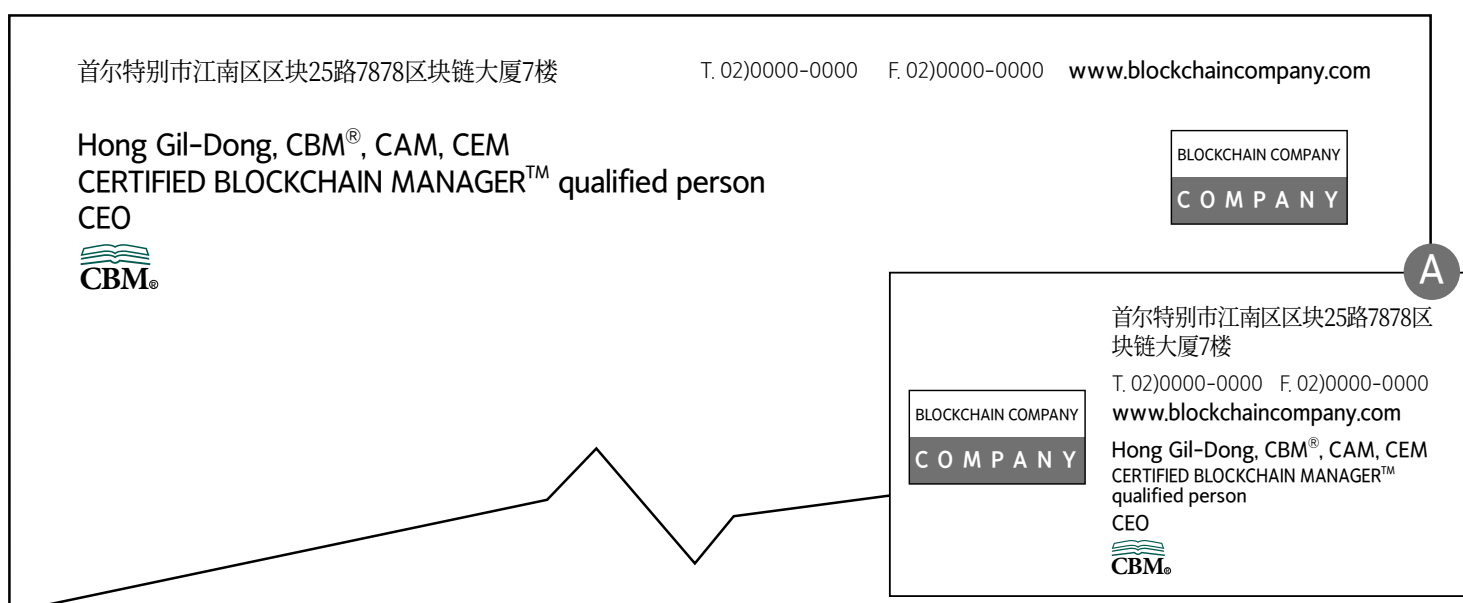

6. 信纸及名片上的使用方法

信纸及名片 (不是实际大小)

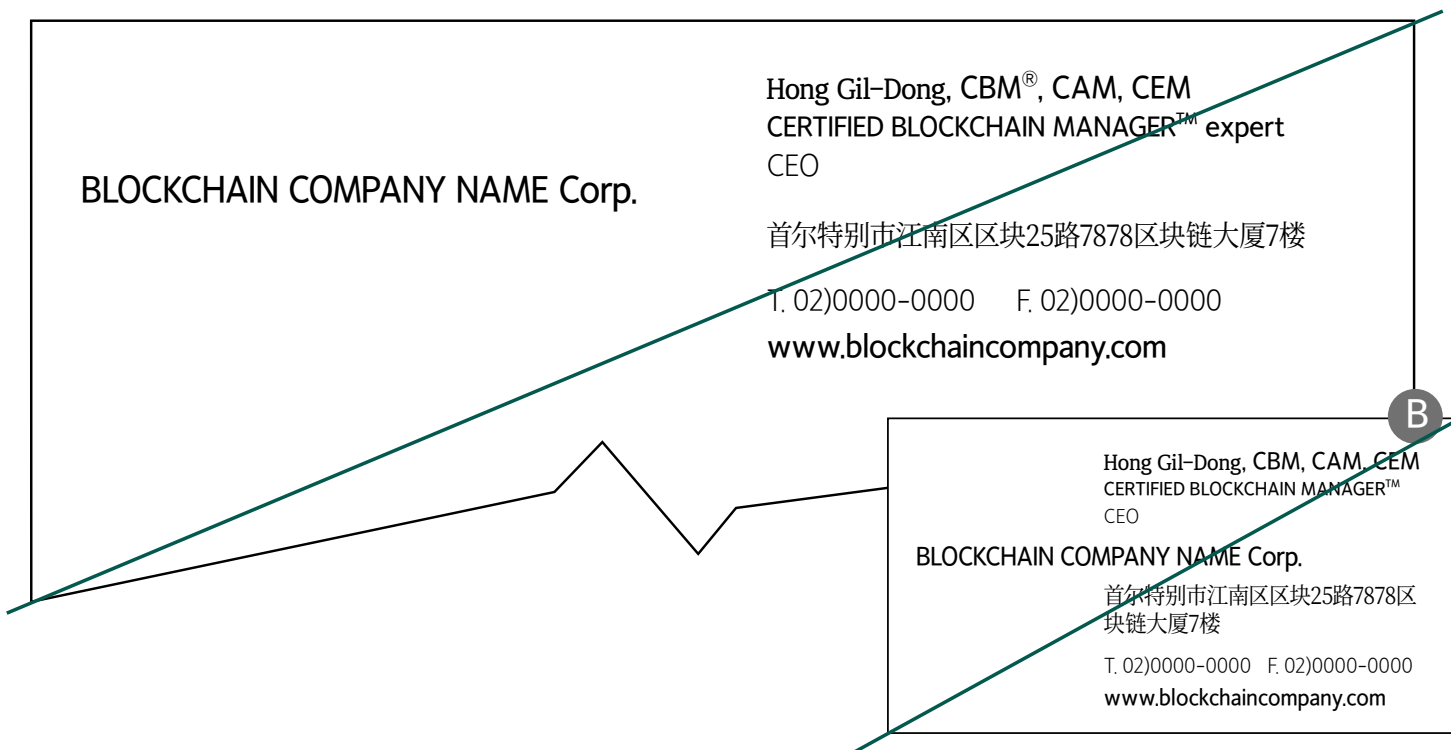

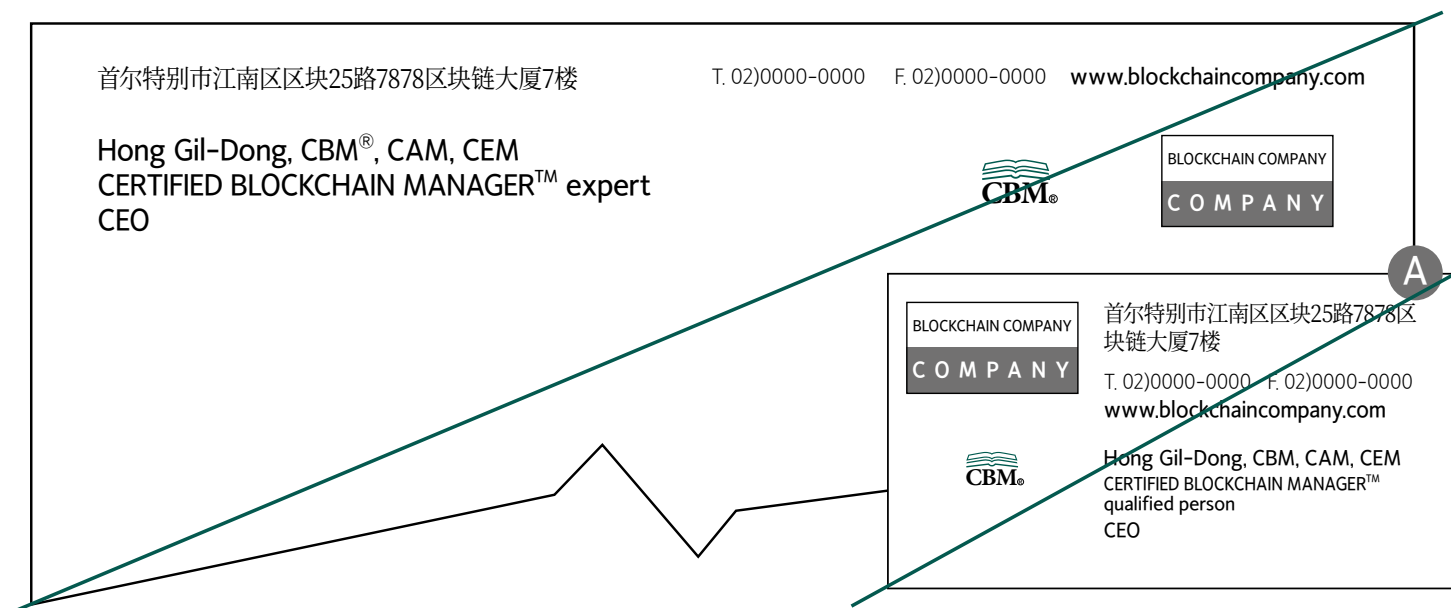

正确用法:

- A 在特定个人名字后面较近的位置使用 CBM 资格表章(CBM®, CERTIFIED BLOCKCHAIN MANAGER™ 及 ).
- B 在特定个人名字后面使用 CBM 资格表章(CBM®, CERTIFIED BLOCKCHAIN MANAGER™).

错误的用法:

- A 没有冒尖子 ®이 없으며 CERTIFIED BLOCKCHAIN MANAGER™ 后面没有名词或使用不适当的名词,  资格商标与公司名称相近, 但与个人资格者的名字相去甚远。
- B CBM®没有冒尖子 ®, CERTIFIED BLOCKCHAIN MANAGER™ 后面没有名词或使用不当名词。

7. 在SNS, 教育, 手册等使用CBM资格表格的方法

1. SNS、Brochures、报纸及杂志报道、册子及会刊等教育及媒体用资料应使用该章规定的方法, 即CBM资格标志。

2. 只有在句子中首次使用资格商标时, 才应使用适当的资格商标标志。

正确用法:

延三钦是区块链专业 CBM® 的资格者。 他和其他5名CBM资格认证者一起工作

Sam is a CBM® professional specializing in blockchain. There are two other CBM professionals working in his office.

延三钦最近获得了 CERTIFIED BLOCKCHAIN MANAGERTM 资格。 他与其他 CBM® 资格者一起在爱沙尼亚工作。 他们认为 CBM 资格认证在区块链领域是最高水平。

Sam recently attained CERTIFIED BLOCKCHAIN MANAGER™ certification. He works with another CBM® professional in Estonia. They consider the CBM certification to be Blockchain's highest standard.

3. 必须插入标签线。

使用 CBM 资格表章时, 应插入Tagraine国文, 必要时可将英文同时插入国文后。CBM® 资格者可以访问WBCIA网站(<http://www.wbcia.or.kr>)下载艺术品。

(1) 国文标记线

“CBM®, CERTIFIED BLOCKCHAIN MANAGER™ 及  资格商标(CBM 资格商标)由 World Blockchain Industry Association(WBCIA)在爱沙尼亚以外的所有国家拥有。

(2) 英文标签线

“CBM®, CERTIFIED BLOCKCHAIN MANAGER™, and  trademarks (CBM marks) are owned by World Blockchain Industry Association (WBCIA) in countries outside the Estonia.

4. WBCIA在爱沙尼亚以外的所有国家都拥有CBM资格证书, 根据与WBCIA的协议, 作为专用使用者, 可以使用CBM资格证书。

在爱沙尼亚以外的所有国家, CBM资格标志的权利所有者不得以难以识别WBCIA的方法使用CBM资格标志。另外, WBCIA也不应使用意指或暗示大韩民国境内特定个人或公司(即使一名以上成员有资格使用CBM资格标志)的推荐方法。

5. CBM 资格标志的形态不得改变或修改。

把CBM资格表章改成文章的形式, 动漫化, 三维化, 或者把CBM资格表章以模式化的背景为基础使用, 或者作为水印, 或者作为背景的一部分使用等, 不得改变其形状或形式。

8. 资格表格复制使用法

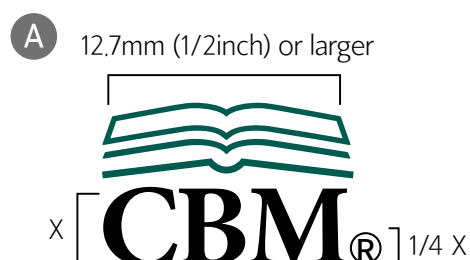

为保持资格商标的质量, 复制该资格商标时, 应使用WBCIA提供的原件插图, 复制的资格商标可辨识文字、可辨认形状, 并且以批准的背景色调为基础, 使用一贯的色彩。 正确复制印刷品时资格商标所需信息如下。

1. 原版艺术品

复制  资格商标时, 应使用WBCIA提供的原件插图。 复制所需的量化(positive)形象和音化(reverse)形象可从WBCIA获得或访问WBCIA网站(<http://www.wbcia.io>)下载。

2. 解读性(Readability)

为保持符号读取性, 将  资格商标与R符号之间的显示标准用三种图形标示出来。 资格商标的大小在1/2英寸(1.27厘米)以上时, 使用标准A;资格商标的大小在1/2英寸(1.27厘米)到9/32英寸(0.71厘米)之间时, 使用标准B;资格商标的大小在1/4英寸(0.63厘米)以下时, 使用标准C。

3. 识别性(Legibility)

如果印刷的  资格商标与其他视觉因素一起印刷, 其效果和识别性就会下降。 因此, 必须将不能添加其他图形图像或视觉要素的空白(clear zone)设置在资格商标的周围。 如下列标准D所示, 本空白(clear zone)的大小以  的文字要素"CBM"大写的高度为准。 但是, 如果该资格商标在文章内被使用, 则可以例外。 为了优化资格商标的识别性, 建议复制的大小至少在1/4英寸 (0.63cm) 以上 (参照标准E)。 如果缩小到更小, 整个资格商标的识别性及视觉效果就会受损。 复制到1/4英寸 (0.63cm) 大小的  资格商标的复制质量不优秀时, 应复制到更大的尺寸。

违反图像标准或正确使用标准的事例的选项参考第4条。

4. 指定背景色调

亮化(positive)  资格商标的背景色调应采用从白色到黑色阴影不超过40%的亮色。黑色阴影达到50%~100%的黑暗背景色调时, 应使用(reverse)  资格商标。背景色调的阴影程度参见下面的例子。

5. 颜色的选择

为确保CBM 资格者即时识别, 必须一贯地使用  资格商标的颜色。 下面的选项A是唯一以公认的颜色标示 资格商标, 图书模样使用PANTONE® 4182 GREEN颜色, "CBM"和"TM"使用黑色。 下面的其它选项表示使用公认的一种颜色。 在打印  资格商标时, 应参照PANTONE® Color Formula Guide, 以便符合准确的颜色和浓度。

A

两种公认颜色:
图书图案为
PANTONE®
4182 GREEN颜色,
CBM®为黑色

B

一种公认颜色:
用黑色印刷
资格商标

C

一种公认颜色:
图书模样是
PANTONE®
4182 GREEN
颜色打印

D

一种公认颜色:
比黑色阴影50%
更深的颜色打印
资格商标

E

出示的  资格商标是深色背景中使用的音化(reverse)的例子。

一种公认颜色的音化(reverse):
黑色背景加白色
资格商标

一种公认颜色的音化(reverse):
PANTONE®
4182 GREEN
背景的白色资格商标

一种公认颜色的音化(reverse):
比黑色阴影50%
更深的颜色背景加
上白色资格商标

CBM 联机测试方法

资格测试Zoom预测试

- ① 预测试在测试前的星期五的12:00至13:00之间进行。
- ② 资格考试Zoom考试前邀请链接将通过文本和电子邮件发送。
- ③ 通过文本或电子邮件检查“缩放”链接, 然后单击该链接进行访问。
- ④ 用手机或计算机/笔记本电脑连接到“缩放”链接, 并检查其是否工作流畅, 例如书写测试答案的形式, 书写形式和在屏幕上书写的形式。关于参加考试, 请问我会回答。

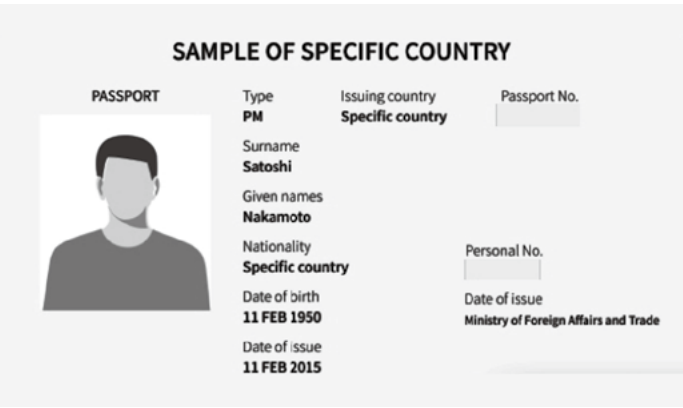

考生识别

- ① 笔试开始前十分钟, 考生可以通过PC或带网络摄像头的手机访问通过电子邮件收到的“ZOOM会议参与链接”, 以检查出勤率。(该链接将在考试时间前20分钟发送到进入全球网络继续教育中心申请(会员注册)的CBM候选人的电子邮件中)
- ② 参加会议时, 请写上候选人的姓名和出生日期。<姓名举例: 洪吉东 (830401) >
- ③ 参加会议后, 在左下角设置[显示视频屏幕]以进行识别。
- ④ 拿起您的ID并将其显示在凸轮上5秒钟以上, 以便测试主管可以对其进行检查。
(请参阅为识别候选人而拍摄的样本图像)
- ⑤ 在ZOOM测试屏幕打开的情况下, 应试者通过PC>资格测试>进行测试登录全球网络终身教育中心。
- ⑥ 根据在线测试时间检查完所有正确答案后, 在测试结束时间之前完成问题解决。
- ⑦ 可以检查并在线回答正确答案, 因此无需打印测试纸。
- ⑧ 提交试卷后不能重新修改, 所以结束时要慎重地按下解题完毕(提交)按钮。
- ⑨ 考试应试完成后, 退出ZOOM考场画面。

注意事项

- ① 请提前准备好护照, 以便能确认照片。
※ 请识别护照号码和个人号码。
- ② 考试场所请在个人空间摘下面具应试。(外部场所不可使用)
- ③ 用ZOOM监督测试。
- ④ 通过ZOOM在监考过程中退出或画面关闭时, 将进行作弊处理。(确认手机电池充电事项, 转换Airplane模式)
※ 仅允许台式机和笔记本电脑参加测试(写答案), 不建议使用其他设备(例如手机)。(可以使用相机用移动设备)
※ 智能手机(缩放连接后, 打开凸轮进行拍照, 以便可以看到您的考试和考试筛选屏幕)
 - 答案必须在考试时间内提交。(提交超过考试时间时未提交处理)
 - 即使按时提交, 也只承认最初提交的答案, 此后提交的答案不予承认。
 - 试验开始后20分钟后, 可在启动器上提交试卷。
 - 进入Zoom考场时, 请将摄像机固定在上半身进行试验。
 - 用于确认应试者本人身份的身份证拍摄样品图片

用于确认应试者本人身份的身份证拍摄样品图片

护照 (识别护照号码)

※ 在变焦注视期间, 屏幕会被记录下来, 并用于将来怀疑有欺诈活动时进行确认, 并且不会用于任何其他目的。

正确的例子:显示器和脸部的一部分 (或整体) 出现时 - 禁止戴口罩 (不是打开本)

错误的例子:挡住屏幕、完全看不到脸的情况

profile

延 三 钦

主要经历

世界集团连锁产业协会(WBCIA)会长
(公司) 韩国区块链产业协会会长
